Objectives

How can Velmora improve audience engagement?

Why?

Based on the sales funnel, social media following, and overall brand recognition, Velmora has clearly moved beyond the awareness phase. The focus should now shift to the **consideration phase**, which involves staying top-of-mind and building an emotional connection with the audience — typically measured by engagement.

Methodology for Data Processing

Content Table

- Organize the data by channel for better analysis.
- Focus on engagement metrics by calculating and analyzing them.
- Try to identify the key elements of the top-performing posts on each channel.

Mention Table

- Remove unrelated mentions using a Python script (with the help of ChatGPT).
- Dive deeper into each source type, source name, and source domain.
- Review the titles to identify key topics and keywords associated with the brand.

Key Insights

How does the audience perceive Velmora?

Top characteristics associated with the brand:

The audience clearly recognizes Velmora’s key characteristics. Therefore, we can identify the most compelling elements to emphasize in order to increase engagement and consideration.

How does the audience perceive Velmora?

Examples (illustrative, anonymized):

@desertdrive22

“Every time a Velmora Raze passes by it turns heads — nothing else on the road looks like it.”

Avg Impressions Engagement
Rate

10.5k

Total Impressions

- From 18 posts, most received positive sentiment, emphasizing the elegance of both the car and the brand.
- The Solara and Terra series received the highest impressions and impression engagement rates.
- Visuals highlighted design and elegance, which is a key audience preference.

Key Insights

- Among 10 organic posts, nearly all were graded A or A+, reflecting strong performance.
- Using the “Velmora Saudi Arabia” link in captions may have a more positive impact than shortened “bit.ly” links — further investigation is recommended.
- This platform has the highest average organic engagement and average organic impressions, underscoring its importance.

Key Insights

- Photos outperform videos significantly in paid campaigns.
- Highlighting a single car per ad improves engagement, as users tend to ask and comment about that specific model.
- Top-performing posts focus on luxurious experiences and premium design features.

3.4

Avg Interaction per 1000 Followers

853

Total Views Count

- There is insufficient data to evaluate YouTube's overall performance.
- Posting only 2 videos per quarter is low. However, one of those videos achieved 780 views and 4.5 interactions per 1000 followers, based on only 882 followers — highlighting YouTube's potential.

Conclusion and Way Forward

Conclusion and Way Forward

1

Overall brand sentiment is positive, strongly linked to prestigious design and luxurious driving experiences.

2

Engagement levels across all platforms range from average to good (except YouTube). A benchmarking analysis (historical or competitive) is needed.

3

Facebook is a key engagement platform for Velmora in this market, which is not typical for the region.

4

High-quality photos are crucial in communicating the brand's essence and engaging the audience.

Conclusion and Way Forward

5

YouTube and LinkedIn show strong potential, especially with consistent, platform-tailored content.

6

Each platform favors specific content formats — e.g., carousels on Instagram, photos on Facebook. Tailor content to each platform's strengths and audience preferences.

7

Models like the Solara and Raze capture strong audience interest.

8

Campaigns should feature diverse styles and storytelling approaches to expand audience engagement.

9

All posts include a Call to Action (CTA) — a positive factor. However, “link click-through” data would help better track engagement and conversion.

Thank You
