

A modern metro train with a yellow and blue livery is stopped at a station platform. The train has a large front window and a digital display above it showing the word "ATTABA". The platform has a glass and metal structure with a patterned roof. The train is on tracks, and the platform is on the left side of the frame.

GL3 Metro Line

Presented by Michel Magdy

Executive Summary

- This is a quantitative survey aimed at understanding consumer perceptions of transportation methods, experiences of GL3 users and non-users, their wants and barriers, as well as identifying gaps and opportunities.
- A total of 1,043 respondents participated while using the GL3. They were nearly equally divided by gender (male and female), socioeconomic classes (B and C), and age groups (18 to 40+), 79% were from the eastern region.
- The metro is the most commonly used form of transportation, serving various purposes such as commuting to work, education, and different leisure outings.
- People are increasingly seeking transportation options that consume less physical and mental energy (particularly with GL3). They prioritize speed, comfort, cleanliness, low crowding, and safety.
- The GL3 experience is perceived positively by both users and non-users, though there is room for improvement points mentioned before like speed, comfort, cleanliness, crowding, and safety.
- Social media (especially YouTube) are the most effective communication channels.
- Timetables, pricing, and station information are the most important elements to highlight in advertisements.

1 Executive Summary

2 Research Objective

**3 Sample and
Methodology**

4 Key Insights

5 Conclusions and Recommendations

Research Objective

- Understanding of the consumers perceptions and usage towards transportation means.
- Evaluating the consumer's transportation journey.
- Identifying the profile of GL3 users and non-users.
- Understanding the need gaps and opportunities for GL3 to grow in the market.

Sample and Methodology

- The study is based on a quantitative survey conducted through structured questionnaires.
- A total of 1,043 respondents participated, sampled equally across all GL3 metro stations.
- The demographic profile is balanced across gender, socio-economic classes B and C, and age groups from 18 to 40+. 79% are from the East region.
- The survey sections included demographics, transportation behavior, GL3 experience and perceptions, user needs, and advertising.

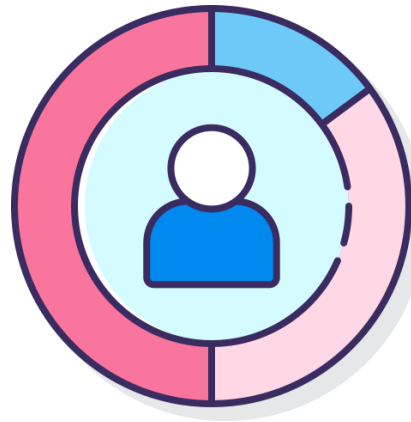

Key Insights

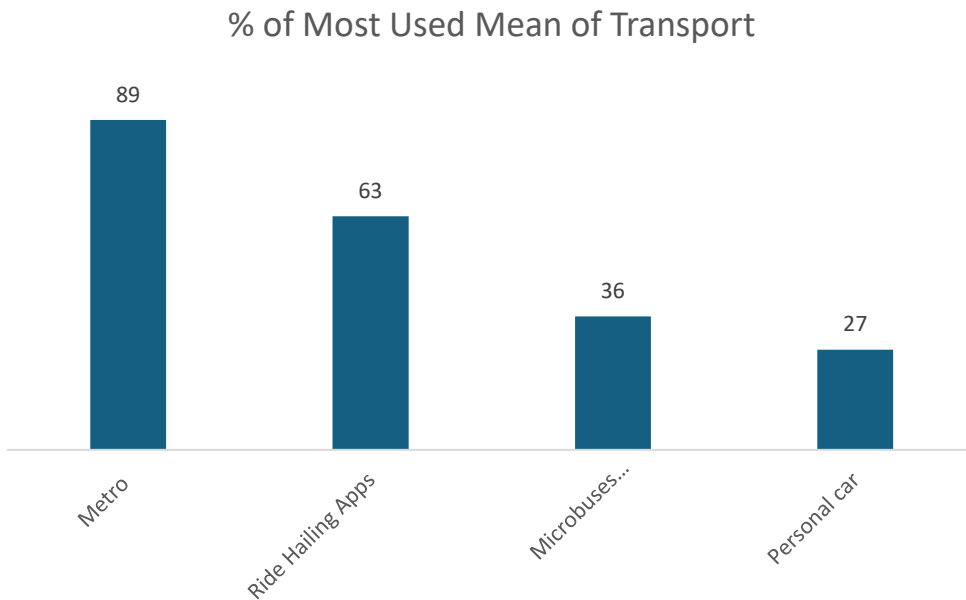

- 50% of respondents are male.
- The average age of respondents is 31 years.
- 40% belong to Class B, 59% to Class C and 1% to Class A.
- 79% are from the East region and 21% for the west.

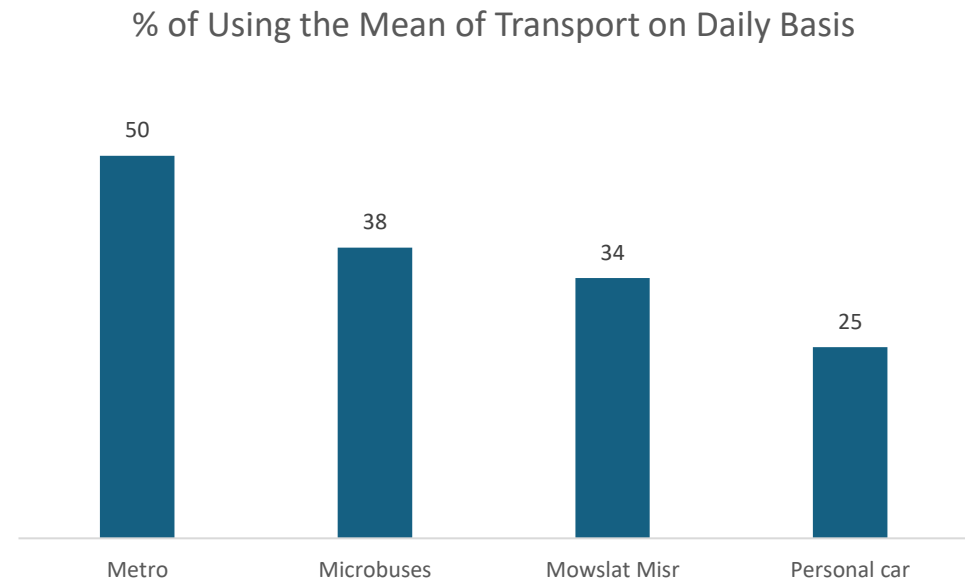

Behavior Towards Mean of Transportations

- The most frequently used transportation method is the metro (89%), followed by ride-hailing apps (63%) and microbuses (36%).

- On a daily basis, the metro is used by 50% of respondents, followed by microbuses (38%) and Mowasalat Misr (34%).

** Microbus and Mowasalat Misr have significantly fewer daily users in absolute numbers.

Behavior Towards Mean of Transportations

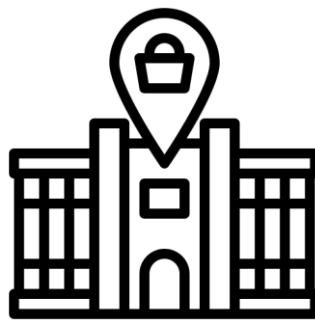

- The metro is used for nearly all types of occasions by more than 80% including commuting for work, education, and outings—except for emergencies.

Behavior Towards Mean of Transportations

- High Speed (73%), Cleanliness (56%), comfort (54%) and safety (48%) are the most important factors when choosing a transportation mean.

High Speed

Cleanliness

Comfort

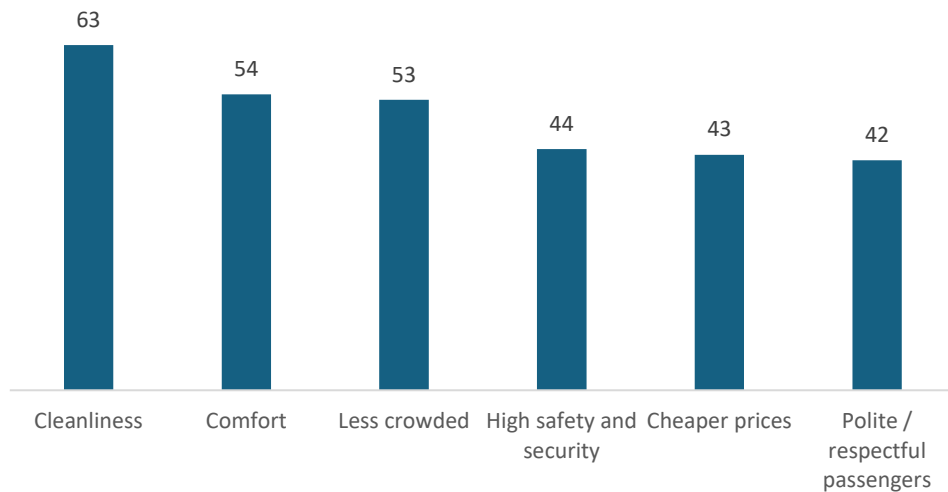

Safety

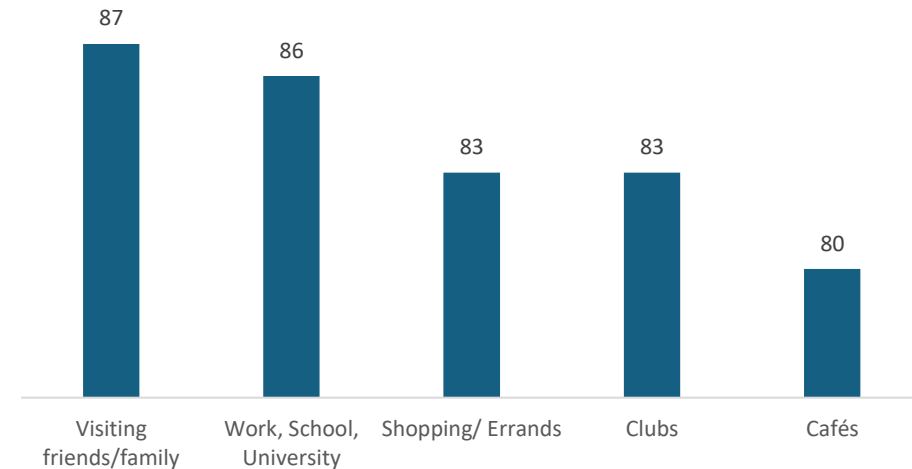

GL3 Section (User Behavior)

- 50% of all respondents are GL3 users.
- They choose GL3 mainly for: Cleanliness (63%), Comfort (54%), Less crowding (53%).
- In other words, they prefer the GL3 line because it offers an environment that reduces physical and mental fatigue, especially for outings, work or education.

Elements to Use GL3 in Specific

% of Using GL3 to different Occasions

GL3 Section (User Experience)

- The overall user experience on the GL3 line is positive, and users are likely to recommend it to others.
- While satisfaction is generally high, improvements can still be made across all key elements highlighted in the survey.
- Satisfaction with the GL3 line is higher than Line 2, which has a score of 3.7.

Score to recommend GL3 to
Others

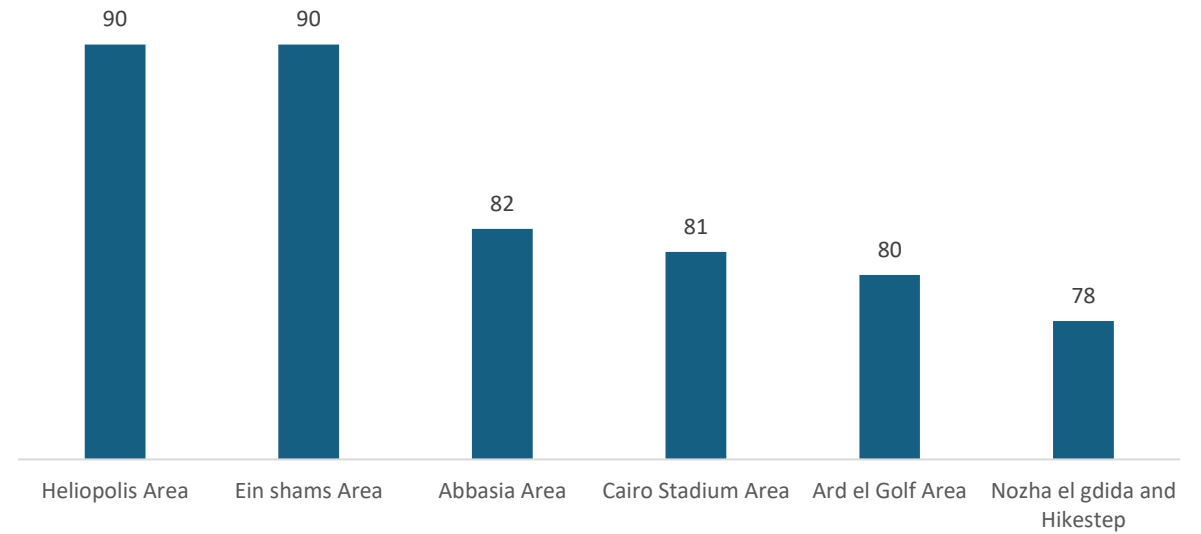

GL3 Section (Non-Users)

- 4.3/5 of non-users will consider the GL3 line in the future.
- Their top reasons include speed (60%), safety (36%), and cleanliness (24%), along side other elements.
- They will use it to go to all the station especially the area of Heliopolis (90%) and Ein Shams (90%).

Motivations for Who will Consider GL3

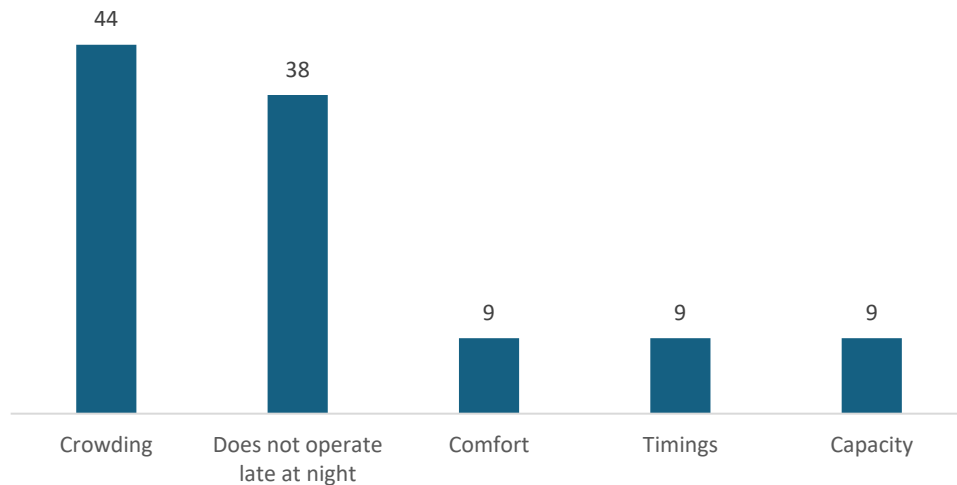

Top Destination using GL3

GL3 Section (Non-Users)

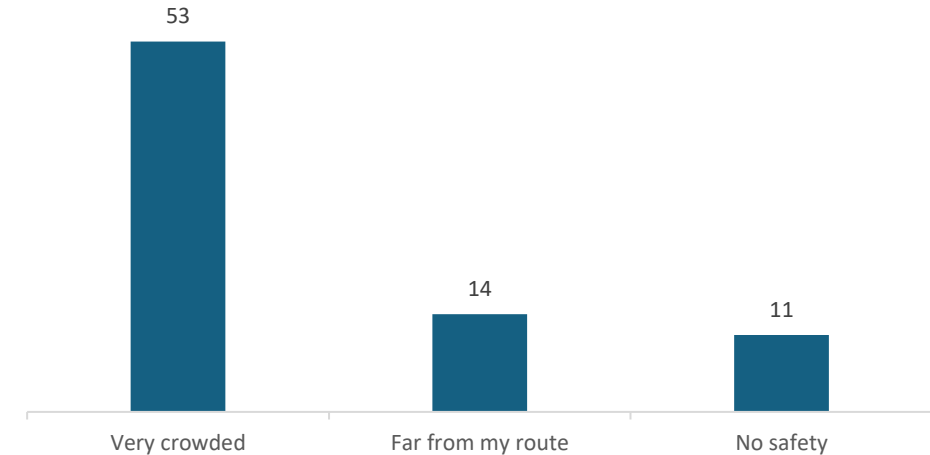

- Crowding (44%) and Early Closing (38%) of GL3 are the main reasons that prevent using GL3 along side smaller factors like comfort, timing and capacity with 9% each.

Barriers That Prevent to Use GL3

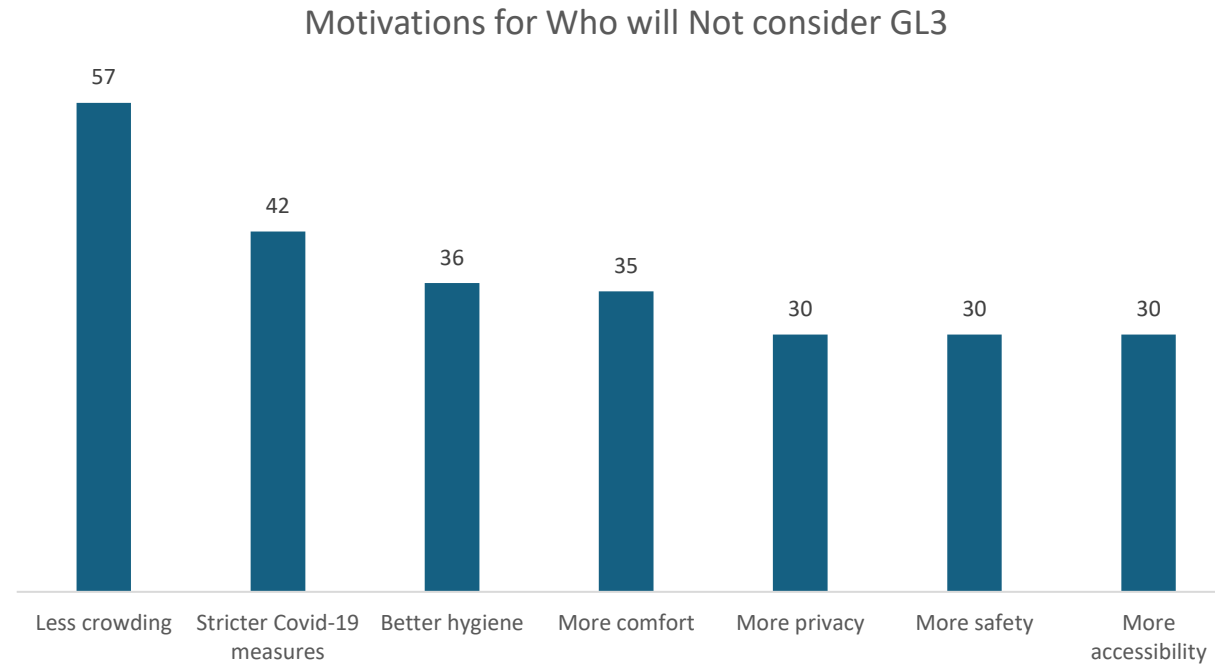

- For those who will not consider GL3 in the future, the crowding (53%), away from destination (14%), absent of safety are key barriers for not considering it.

Barriers for Who will not Consider GL3

GL3 Section (Non-Users)

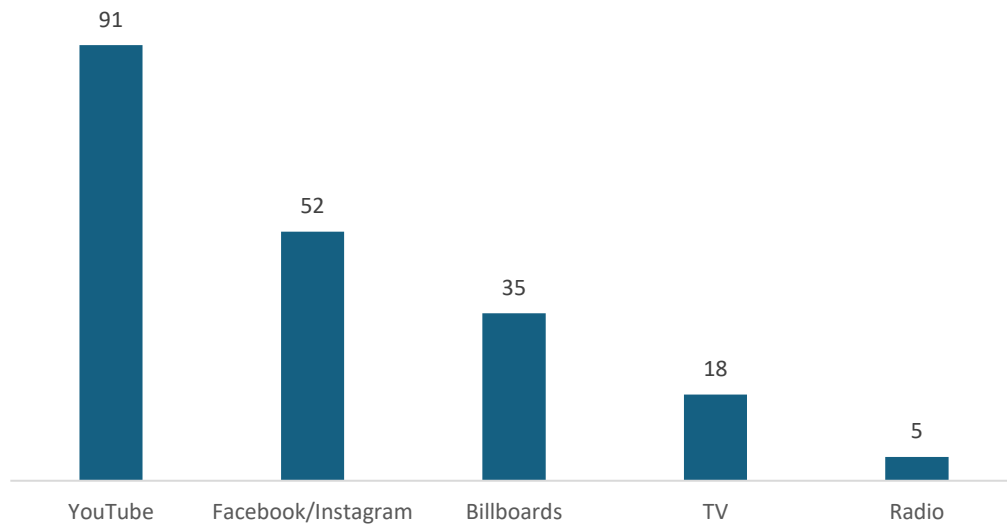

- Motivations and Concerns are similar for who will or not consider GL3.
- However, who will consider might look for higher standard of less crowding (57%), clean (42%, 36%), and more comfort (35%).

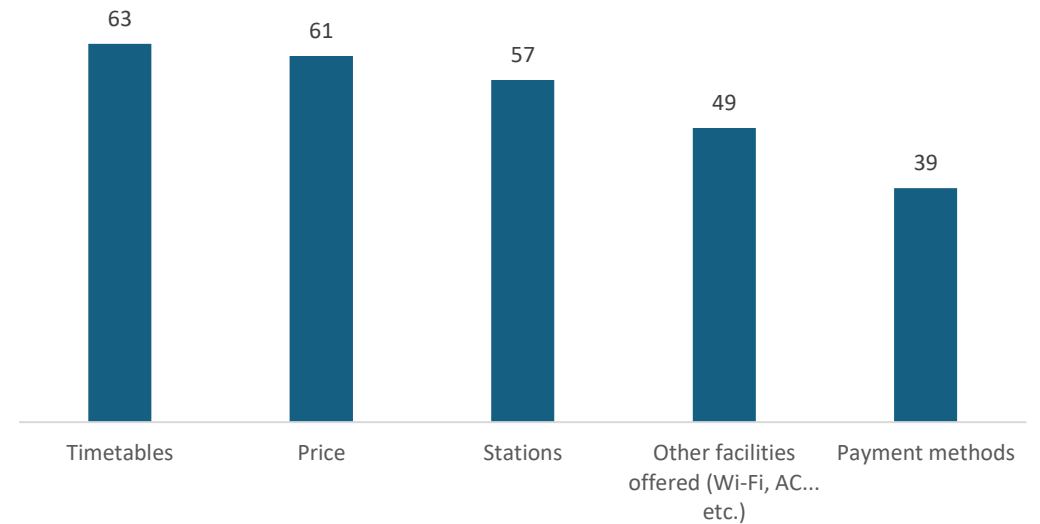

GL3 Section (ADs)

- Nearly 70% have seen the Ads,
- Social media are the main channels, especially YouTube (91%) followed by Facebook and Instagram (52%).
- Timetables (63%), price (61%), and stations (57%) are the most important elements in a transportation Ad.

Conclusions and Recommendations

Conclusions and Recommendations

1

The metro is the most commonly used mean of transport for work, education, and different outings.

2

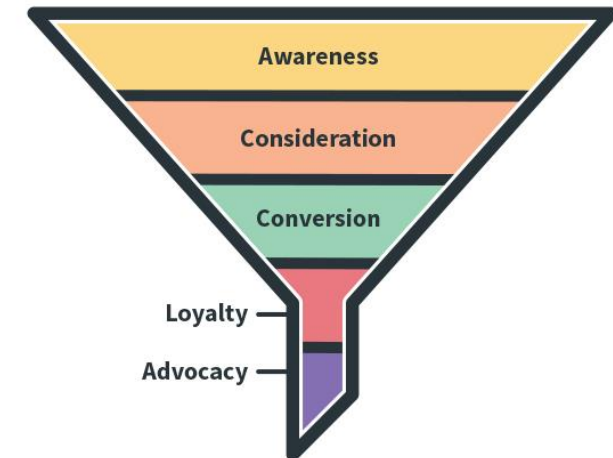

Passengers value transport options that minimize both physical and mental effort (especially on the GL3), therefore, they are looking for high speed, comfort, clean, less crowded and safety (particularly post Covid - 19)

3

GL3 experience journey is positive for the users and non users, however, this is still a room for improvement, focusing the points mentioned (high speed, comfort, clean, less crowded and safety).

4

The GL3 metro has strong recognition and is positioned between the consideration and conversion stages. Focus should shift toward increasing conversions and maintaining user loyalty.

Conclusions and Recommendations

5

Enhance hygiene and sanitation through strict cleaning schedules and providing hand sanitizer or masks.

6

Enhance comfort and reduce crowding by increasing the number of trains or carriages and raising train frequency during peak hours.

7

Enhance in-car and overall comfort through regular maintenance of seating, air conditioning ...etc.
Also aim to reduce ticket queue times, particularly during rush hours.

8

Invest further in social media advertising—especially on YouTube, and experiment with other channels to broaden reach.

9

Ensure advertising highlights key elements that matter most to users: timetables, pricing, and station accessibility.

Thank You
